n8n M-Pesa Mastery

Support Policy : n8n M-Pesa Mastery

Last updated: 2026-10-03

This support policy explains what buyers of **n8n M-Pesa Mastery** can expect when asking for help.

1. Supported platforms

This course is officially supported on:

- **macOS**
- **Windows**
- **Linux**

The course is built around Git, Docker, a browser, Postman, and local configuration using `.env` files.

2. Support channels

Primary support contact:

- **Email:** `support@yourcourse.co.ke`

Optional community support:

- **Discord / Telegram / community channel:** add your current support link here
-

3. What support covers

Support normally includes help with:

- accessing the course after purchase
- private repo invitation or access issues
- finding the correct setup guide for macOS, Windows, or Linux
- obvious broken links or missing files in the course materials
- local Docker startup problems related to the documented setup
- importing the provided n8n workflows

- importing the provided Postman collection
 - understanding which course file to use at each stage
-

4. What support does not include

Support does **not** normally include:

- custom consulting for your business or client project
 - debugging your unrelated production environment
 - modifying the workflows for your unique business rules for free
 - installing tools on locked-down corporate devices you do not control
 - troubleshooting unsupported third-party infrastructure not covered in the course
 - full one-on-one implementation help unless your tier or separate agreement includes it
-

5. Response targets

Target support response times:

- **Business days:** within 1–3 business days
- **Weekends / holidays:** next business day or later depending on workload

These are response targets, not guaranteed SLAs, unless separately agreed in writing.

6. Best way to ask for help

To get help faster, include:

- your operating system (macOS , Windows , or Linux)
- the exact step you are on
- the exact error message
- whether this is a setup, workflow, callback, Postman, or access issue
- screenshots if helpful

For technical issues, include the smallest reproducible detail possible.

7. Scope by tier

Starter

Support is limited to:

- access issues
- broken file / broken link issues
- general setup guidance based on the published docs

Pro

Support includes Starter support plus:

- consumer repo access issues
- clarification on included workflows and student assets

Agency

Support may include additional help if explicitly promised in the checkout offer, such as:

- private consult sessions
- implementation guidance
- commercial packaging clarification

If Agency support is offered, define it clearly on the checkout page.

8. Community etiquette

If you provide community support spaces:

- do not post private credentials publicly
- do not post production secrets or tokens
- do not share private repo contents outside the paid access path
- be respectful to other learners

Access may be removed for abuse, harassment, spam, or unauthorized sharing.

9. Course updates

The course may be updated over time to reflect:

- Daraja API changes
- workflow improvements
- documentation fixes
- additional support clarifications

Update access depends on the tier and the original purchase rights offered at checkout.

10. Contact

For support requests:

- **Email:** `support@yourcourse.co.ke`
- **Product:** `n8n M-Pesa Mastery`
